## Background

Concentrix, the National Relay Service (NRS) provider (relay and helpdesk services), submits activity and performance data to the Department of Infrastructure, Transport, Regional Development, Communications and the Arts (the Department). This information is used to review the performance of the NRS against agreed service levels as well as provide data and information about how the NRS has been used in that month.

The Department then reports on NRS performance against agreed service levels and information on how the NRS is used, including the number of successful outbound connections, the number of calls to emergency services and the number of enquiries to the NRS helpdesk.
